

# Ferroamp Emergency Power 3P

## – No More Power Outages

- Operating power: 11 kW (3×16 A)
- Backup from EV with V2X charger
- Connection for external generator
- Relay output for controlling large loads

### Enduring backup

Ferroamp Emergency Power 3P is a backup to keep the Ferroamp system—with batteries and PV—running during a power outage and supply the entire house with electricity.

Together with a generator or a V2X charger, you can handle even longer outages.

The backup unit is classified as an UPS and the compact measuring earth gives an easier and cheaper installation.
